

# A family dentist who makes YOU feel like family

Isn't it time you had a dentist who...

- Knew your name
- Didn't make you wait
- Treated you with respect
- Had a complete range of services
- Went the "extra mile" for you
- Made you feel at home

## Does your dentist know your name?

Let's face it. There are lots of dentists out there. Some are better. Some are definitely worse.

How do you choose who is the right dentist for you?

- Does your dentist treat you like an individual, not just like another set of teeth?
- Does your dentist know who you are?
- Does he care about how you are doing?
- Does he know your name?

If being treated like a person and not just another chart is important to you, try the dental services of Dr. Chris Bernardini.

### **3 generations of patients**

Dr. Chris' Dad, Alex, opened the dental practice on Old Town Road back in 1962. Chris joined the practice in 1982. Chris has continued to treat his Dad's patients, and their children and even their grandchildren.

Why do they keep coming to Dr. Chris?

Because he treats you with respect.  
Because he treats you with skill.  
Because he uses the latest technology and most effective techniques. And, above all, **because he treats you like family.**

## Giving you the time and attention you deserve

Dr. Chris and his devoted staff make it their absolute policy to give you the time and attention you deserve.

### **Never overbooked**

The staff at Dr. Bernardini's make sure to never overbook. They will not make appointments for others at the same time as you have your appointment. They won't make too small of a time difference between appointments, so patients "pile up" in the waiting room.

In almost every case, you will not have to wait for more than a few minutes to be seen.

### **Real privacy**

Dr. Chris' has several comfortable dental rooms where you will get the best in dental care. You will meet privately with a dental hygienist who will give you undivided care. Dr. Chris will then meet with you and give you his complete attention. Even billing questions can be discussed privately in a separate administrative discussion room.

### **Real attention**

Dr. Chris will take the time to really explain your dental status with you. He will show you your charts, talk about your current situation, and help you make a solid plan for future dental care.

He will **answer your questions**, and never make you feel like you were rushed out the door without having all the information you requested.

## It's about your health

Making sure that your teeth are as healthy as they can be is Dr. Chris' main goal.

### **Comprehensive oral hygiene**

Dr. Chris makes sure to go beyond the symptoms, and to get to the causes. He goes through a thorough evaluation of your dental status, and maps out a plan for future dental health. As he puts it, "Start from the ground up."

### **The latest techniques**

Dr. Chris uses the latest, most beneficial techniques in a wide range of dentistry

- Complete family dentistry with maximum comfort
- Cosmetic dentistry, including bleaching, bonding and veneers
- Sports dentistry, including sports injury, customized mouth guards
- And a lot more...

### **50-90% less radiation**

Dr. Chris' uses Digital Dental X Rays. This method uses electronic sensors that take deep images of your teeth...no more flimsy negatives that you can barely see. Dr. Chris shows you your teeth from the inside out, on the computer, right in front of you...And no more dangerous bursts of radiation. Digital x rays give 50-90% less radiation than traditional dental x-rays!

### **Completely sterile instruments**

Dr. Chris makes sure his instruments are absolutely, completely sterile before using them. *He opens a sealed plastic set of dental tools in front of you.*

## THE DENTIST WORE A TUXEDO!

*And other  
stories from the  
dental practice  
of Dr. Chris...*

It's true...Dr. Chris once treated a dental patient while wearing a tuxedo. He was on his way to a formal occasion, when the beeper rang. It was an emergency, a patient was in a lot of pain and needed help right away....Imagine the patient's surprise when his dentist greeted him while wearing bow tie and tails.

Or there's the time when Dr. Chris paid a house call. Have you ever heard of a dentist making a house call? Dr. Chris treated a terminally ill patient with utmost respect. The patient could not make it in to the office...Dr. Chris brought the office to her. And brought her the dignity of kind treatment and the relief of pain.

Or there's the time Dr. Chris personally carried an ill patient out to the person's car. By himself, down the stairs, into the car. Because "it was the right thing to do."

Or there's the pictures on the walls of the office. Pictures of Dr. Chris' patients who are now serving their country so bravely in Iraq and Afghanistan. Pictures you would send to family. Pictures you would display for all to see.

With Dr. Chris, it's about treating you as a person, treating you as family.

If you'd like your dentist to treat you like that, make an appointment today with Dr. Chris Bernardini.

**You haven't seen your dentist  
in how long?!**

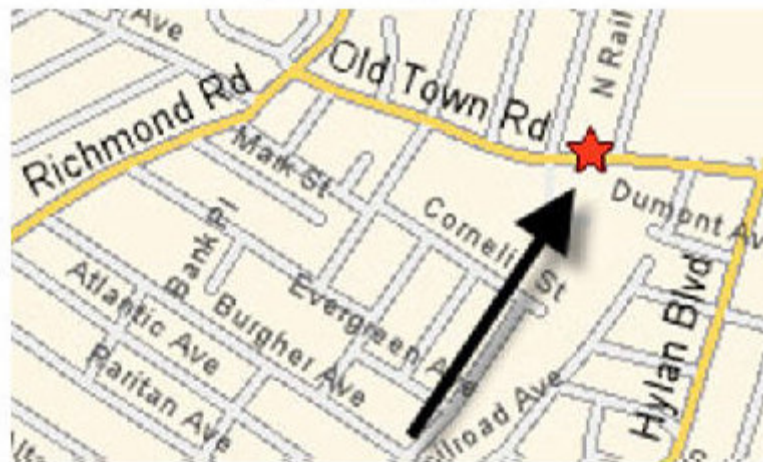

(What's a family without a little guilt?)

Come on, we'll make you feel at home.

Dr. Bernardini's office is conveniently located in  
the Dongan Hills section of Staten Island.

It is between Hylan Boulevard and Richmond  
Road, near the Carmel Richmond Nursing  
Home, and walking distance from the Old Town  
Station of the Staten Island Rapid Transit.
